VR

I have a special interest in VR & 360 Video and over the past year have been avidly developing my expertise in the medium. Extensively researching and experimenting with a wide range of camera rigs, rig-mounts, shooting styles & stitching techniques I have been mastering the challenges of this relatively new medium.

You can check out some of my VR work & explorations here:

<http://www.magicbagmedia.com/>

DOP

As a shooter-director & DOP, in far-flung, isolated locations, live events, or in the studio, I rely on my technical expertise, creativity and adaptability, along with my ability to rally and guide a team, to consistently get the shot and bring back what is needed to the wider production team.

Self-Motivated & disciplined, while thriving as part of a creative team, I lead, collaborate & take direction as needed.

Having created content independently, I'm adept at understanding requirements, pitching to clients, defining a brief, identifying opportunities to innovate & gathering together a team with the skill-set needed.

I hold both English and South African citizenship, can travel extensively for work, and am happy to do so.
